CABINET KNOBS & PULLS

Lacquered Polished Brass
Warm, with a sense of tradition, this highly polished finish is opulent without being flamboyant.

Polished Chrome on Brass
A bold classic contemporary finish on Solid Brass. The mirror effect reflects light and colours of the surroundings.

Satin Chrome on Brass
The refined brush marks of Satin Chrome will appeal to those who favour a contemporary matt finish.

Lacquered Satin Nickel on Brass
With its honeyed grey tone, created by brushed nickel plating on brass, Satin Nickel is a warmer alternative to Satin Chrome.

Lacquered Antique Finish on Brass
With russet hues and a brass undertone, this variation on brass retains a warm character but adds age and maturity by highlighting a spectrum of shades making each piece both alluring and unique.

Polished Nickel on Brass
With a subtle golden hue, this is a softer alternative to Polished Chrome. Polished Nickel finish is not lacquered and will oxidise naturally and continue to change over time by taking on an aged patina. Regular buffing with a soft cloth will help maintain the bright finish.

Matt Lacquered Satin Brass
A modern alternative to traditional Polished Brass. This attractive brushed texture mellows the colour of Solid Brass and adds warmth and richness to both a traditional and a soft contemporary décor.

Matt Lacquered Bronze Finish on Brass
An aged finish on brass creating a vintage appearance, yet one that also looks outstanding in contemporary schemes. Over time a dual patina of colour will emerge as the Solid Brass is revealed from underneath along any edges that are frequently touched.

Matt Lacquered Satin Rose Gold Finish on Brass
Rose Gold is a traditional alloy used in Jewellery, blending gold with copper to create a delightful rosy red tint. We have replicated a similar appearance by applying a matt Copper plating over Solid Brass. Our Rose Gold finish cabinet hardware adds a touch of warmth and luxury to any furniture.

Powder Coated Matt Black on Brass
A matt lacquered black finish is applied to a Solid Brass surface creating our distinctive Matt Black contemporary look.

AC	Aged Copper Finish on Brass	Lacquered finish with a Copper undertone.
AN	Aged Nickel Finish on Brass	Lacquered finish with a Nickel undertone.
AB	Aged Brass Finish on Brass	Lacquered finish with a Brass undertone.

Fossil Range

BLK	Matt Black Finish on Zinc Alloy Our Industrial Range Matt Black finish on Zinc blends a modern finish with distinct design .
DB	Distressed Brass Finish on Zinc Alloy Our Industrial Range Distressed Brass finish on Zinc blends a modern finish with distinct design.
Oi	Old Iron Finish on Zinc Alloy Our Industrial Range Old Iron finish on Zinc blends a modern finish with distinct design.

INDUSTRIAL ♦ RANGE

FB	Powder Coated Matt Black on Iron Using traditional moulding methods to create contemporary designs, our range of Malleable Iron products are unique, combining rustic charm with current trends. The black powder coated finish creates a modern classic style.	— Matt Black Rustic Iron —
-----------	---	-----------------------------------

BZ/WM	Waxed Bronze Patina on Solid Bronze Creating Two Distinct Bronze Finishes These striking products are made using molten Bronze flowing into cavities within a sand mould. This casting process leaves light surface indentations to bestow a rustic appearance which contrasts in texture to other smoothly finished products. A light bronze patina is applied by hand on the cast bronze creating a country-style appearance. Over time the bronze colour will lighten along any edges and surfaces that are frequently touched creating a naturally aged appearance as the bronze below is slowly exposed. When untouched, the finish may darken as the bronze oxidises. As this is a living finish, products will not be identical, there will be slight variation in hue and tone.	— Solid Bronze Rustic —

BLACK IRON

Solid Bronze Rustic

DOOR & CABINET HARDWARE

SOLID BRONZE

Solid Bronze Rustic

These striking products are made using molten Bronze flowing into cavities within a sand mould. This casting process leaves light surface indentations to bestow a rustic appearance, which contrasts in texture to other smoothly finished products. A light bronze patina is applied by hand on the cast bronze creating a country-style appearance.

Over time the bronze colour will lighten along any edges and surfaces that are frequently touched creating a naturally aged appearance as the bronze below is slowly exposed. When untouched, the finish may darken as the bronze oxidises. As this is a living finish, products will not be identical, there will be slight variation in hue and tone.

SOLID BRONZE

Lacquered Finishes

Many metals suffer from surface tarnishing if left exposed to the atmosphere.

Surfaces can be protected with the application of different protective finishes, such as paint, metal coating or lacquer.

We apply a clear lacquer to our products which forms a protective surface layer; but does not detract from the inherent beauty of the product.

The life of the lacquer can be affected by many environmental or atmospheric conditions, including sea air and industrial pollution.

Polished Brass, Satin Nickel, Antique Brass, Matt Bronze, Satin Brass and Satin Rose Gold are all lacquered finishes.

To help maintain the lacquered finish, we recommend the following: -

- Keep it clean by removing dust or liquids from the surface with a soft non-abrasive cloth.
- Do not use metal cleaners or aerosol sprays as these will damage the lacquer coating.
- Avoid impact with rings, keys and other metallic objects which may damage the lacquer.

With maintenance and by reducing the risk of scratching, the life of the lacquer can be prolonged.

SUPPLEMENTARY INFORMATION ON SELECTED FINISHES

Antique Brass

To create this finish our solid brass products are firstly oxidised to create a dark patina.

This patina is then removed by hand, partially revealing the brass below, making each piece unique with variations in colour and tone and a clear lacquer is applied.

Matt Bronze

To create our Matt Bronze finish, we have oxidised the brass surface to produce a dark brown patina and a clear lacquer is applied.

Over a period of time any edges and surfaces that are frequently touched will expose the brass below creating a naturally aged appearance.

Expect this finish to change naturally over time.

Black Iron Rustic

By powder coating our iron products we create a Matt Black finish which is both attractive and durable.

As the name suggests this range has imperfections on the surface which are retained to create the rustic appearance.

To protect the finish please avoid impact with other metal items and remove dust and water from the surface with a soft non-abrasive cloth.

Polished Chrome and Satin Chrome

Regularly removing dirt and watermarks and buffing with a nonabrasive cloth will help maintain the life of these finishes.

Polished Nickel

Our Polished Nickel finish is nickel plating on highly polished brass.

The nickel finish is not lacquered, it is a "living finish" which means it will change naturally over time. The finish will oxidise to create a misty patina which can be removed from the surface or left to age gracefully.

Expect this finish to change naturally over time.

Solid Bronze Rustic

Our Solid Bronze finishes are coated with a wax paste to prevent immediate oxidisation.

Both of our Bronze finishes are "living finishes", and therefore as the wax is slowly removed with usage, the bronze below will be exposed to the atmosphere and will start to change colour.

Most visibly the frequently touched areas will lighten with use creating a naturally aged appearance.

Expect this finish to change naturally over time.
